Education

Galgotias University, Greater Noida 2024 – 2028
Bachelor of Technology in Computer Science & Engineering **CGPA: 8.75/10**

Experience

Senior Web Development Mentor – Galgotias Web Development Club 2026 – Present
- Mentor students in frontend, backend, REST APIs, databases, authentication, debugging, and deployment through hands-on technical sessions.
- Guide students through designing, implementing, and deploying full-stack applications.

Team Lead – Smart India Hackathon 2026 2026
- Led a **6-member engineering team** to build **ThreatTrace**, a cybersecurity threat detection and forensic intelligence platform.
- Coordinated architecture, implementation, integration, ML inference, testing, and cloud deployment.
- Ranked **Top 16** in university-level SIH 2026 pre-qualifiers, making the team eligible to apply for national-level selection.

Full Stack Developer – SkillYug Aug 2025 – Oct 2025
- Implemented secure email and OTP authentication using Supabase Authentication and EmailJS; contributed to Next.js routing and backend integrations in a four-developer startup team.

Customer Service Executive Intern – Tech Mahindra Aug 2025 – Sep 2025
- Handled customer issues in a structured service environment, developing experience in problem diagnosis, resolution, communication, and escalation.

Projects

ThreatTrace – Cybersecurity Threat Detection & Forensic Intelligence Live — GitHub — Demo
- Built a **production-deployed cybersecurity platform** combining email threat analysis, BERT-based phishing detection, ClamAV malware scanning, and threat-intelligence enrichment.
- Developed backend services with **Node.js, Express.js, TypeScript** and frontend with **React, Next.js, TypeScript**.
- Integrated a **BERT-based phishing model** and deployed ML inference and ClamAV services on **Google Cloud**.
- Implemented event-driven processing using **Gmail/Outlook triggers and Google Pub/Sub**; deployed across Vercel, Render, and Google Cloud.

Horizon AI Runtime – Distributed AI Compute Platform Live — GitHub — Demo
- Building a distributed AI inference platform that connects underutilized computing resources to run AI models through intelligent, resource-aware scheduling.
- Developing a production-oriented system using **Node.js, TypeScript, PostgreSQL, Drizzle ORM, WebSockets, Next.js, and Ollama**, enabling worker registration, deployment management, and remote inference across heterogeneous machines.

PulsePay App – Closed-Loop Digital Wallet GitHub — Demo
- A Flutter-based closed-loop wallet supporting device-independent transfers.
- Designed cloud infrastructure using **Firebase Cloud Functions, Firestore, Cloud Storage, and Google Cloud**; implemented credential protection using Argon2 and bcrypt.

Achievements

- Solved **593+ LeetCode** problems; current **LeetCode rating: 1,749**; **Codeforces rating: 1032**.
- **Winner** – Bitcoin India Tour 2.0 Quiz Competition, organized by TechnoJam Club, Galgotias University (Apr 2025); won a Ledger Nano S Plus cold wallet giveaway.
- **CodeYourFuture** open-source Contribution through a merged pull request improving using Mermaid diagrams. Link

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript, Dart, Rust, Solidity
Web & Backend: React, Next.js, Node.js, Express.js, REST APIs, Authentication
Databases: PostgreSQL, MongoDB, MySQL, Redis, Firebase, Firestore
Cloud & Infrastructure: Google Cloud, AWS, Docker, Firebase Cloud Functions, Google Pub/Sub, Vercel, Render, Git, GitHub
AI / Security: Machine Learning, BERT, Phishing Detection, ClamAV, Cybersecurity, Cryptography
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Distributed Systems

Certifications

- GitHub Foundations Link
- AWS Academy Cloud Architecting Link
